Description

SharePlus, your SharePoint data in your hands.

Sync your favorite SharePoint lists and libraries automatically and take them with you in your iPad/iPhone/iPod Touch. Work with them on the go, and sync back to SharePoint when online.

SharePlus is a "UNIVERSAL APPLICATION" = Buy it once and use it in all your iOS devices with a single purchase!

Collaborate with your team, sharing documents, calendars and tasks lists right from the meeting room, a taxi, or when out visiting a client, regardless of where that client is, and what network connectivity is like at his location. Browse and edit documents, discussions, announcements, InfoPath forms, reports, wiki pages and custom lists. Capture images, video and audio directly from your device into SharePoint.

SharePlus will work with your current SharePoint credentials, so you won't have to ask for special permissions to use it. SharePlus doesn't also require any server side components.

Among SharePlus features are:

CONTENT MANAGEMENT

- Add, edit & delete list items, supporting Calendars, Tasks, Pictures, Contacts, Custom Lists, Discussion Boards, Documents and External List.
- Picture Management: Add pictures to rich text, and hyperlink fields automatically, from your album or take a new photo with the camera.

DOCUMENT MANAGEMENT

- Send/Receive documents from/to 3rd party applications using the "OPENIN" feature. Received documents are sent to the list they were edited from, or they are staged in a "Local Files" folder, and may be attached to any list item, or used to update any document.
- Full CONTENT TYPE support.
- Check In/Check Out & Approve/Reject support.
- Integration with Quickoffice Pro HD and Office Web Apps.

SharePlus v3.0 Feature Set

Feature	Lite	Pro	Enterprise
Verify connection button	✓	✓	✓
Email Viewer	✓	✓	✓
Contextual Menus	✓	✓	✓
Contextual WebView	✓	✓	✓
Account Management	✓	✓	✓
Rich Text Editor		✓	✓

Offline filter & sorting		✓	✓
Offline search			✓
Advanced List Search			✓
Enterprise Search			✓
User Profiles Search & Detail			✓
Permission based hiding			✓
Configurable URL Based help			✓

Async Backend

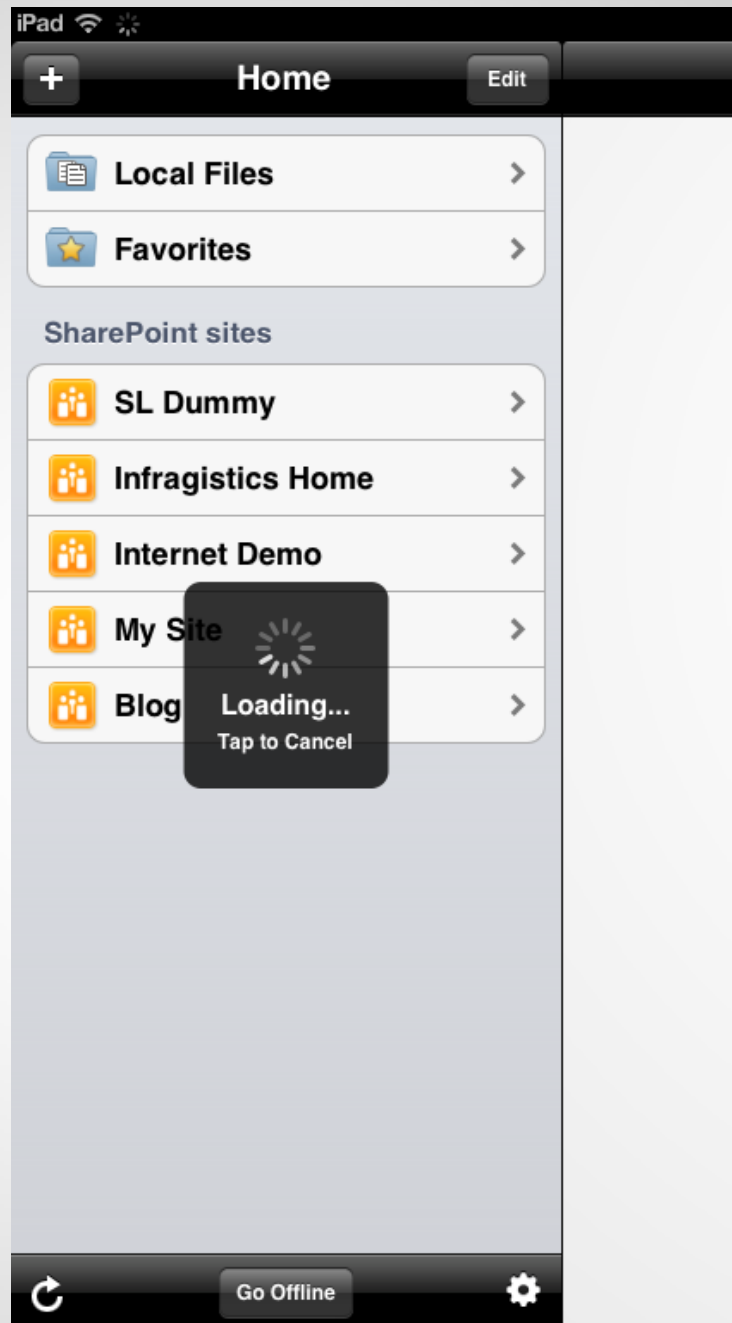

All operations are asynchronous when interacting with the server

Timeout can be configured

Performance enhanced

Allows for background synchronization

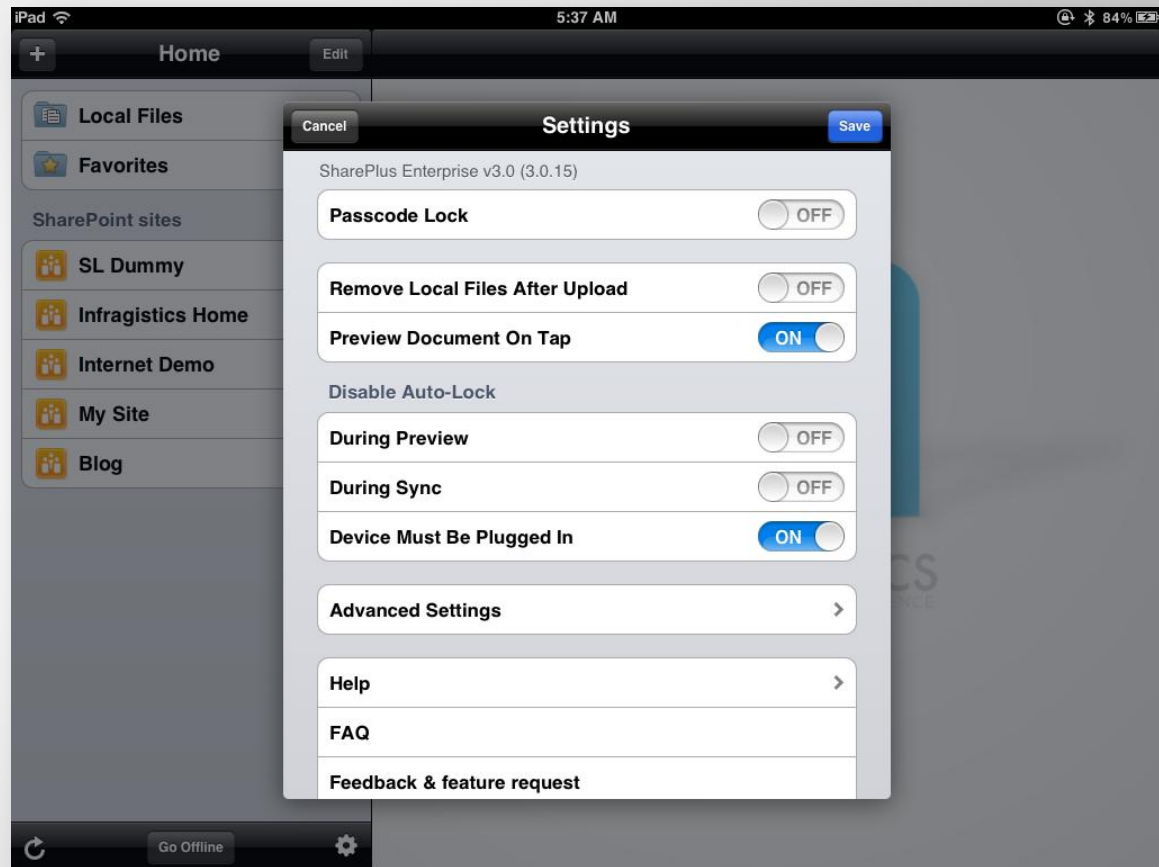

User can Cancel operation

Disable Auto-Lock

Ensure that synchronization continues by disabling auto-lock on your device.

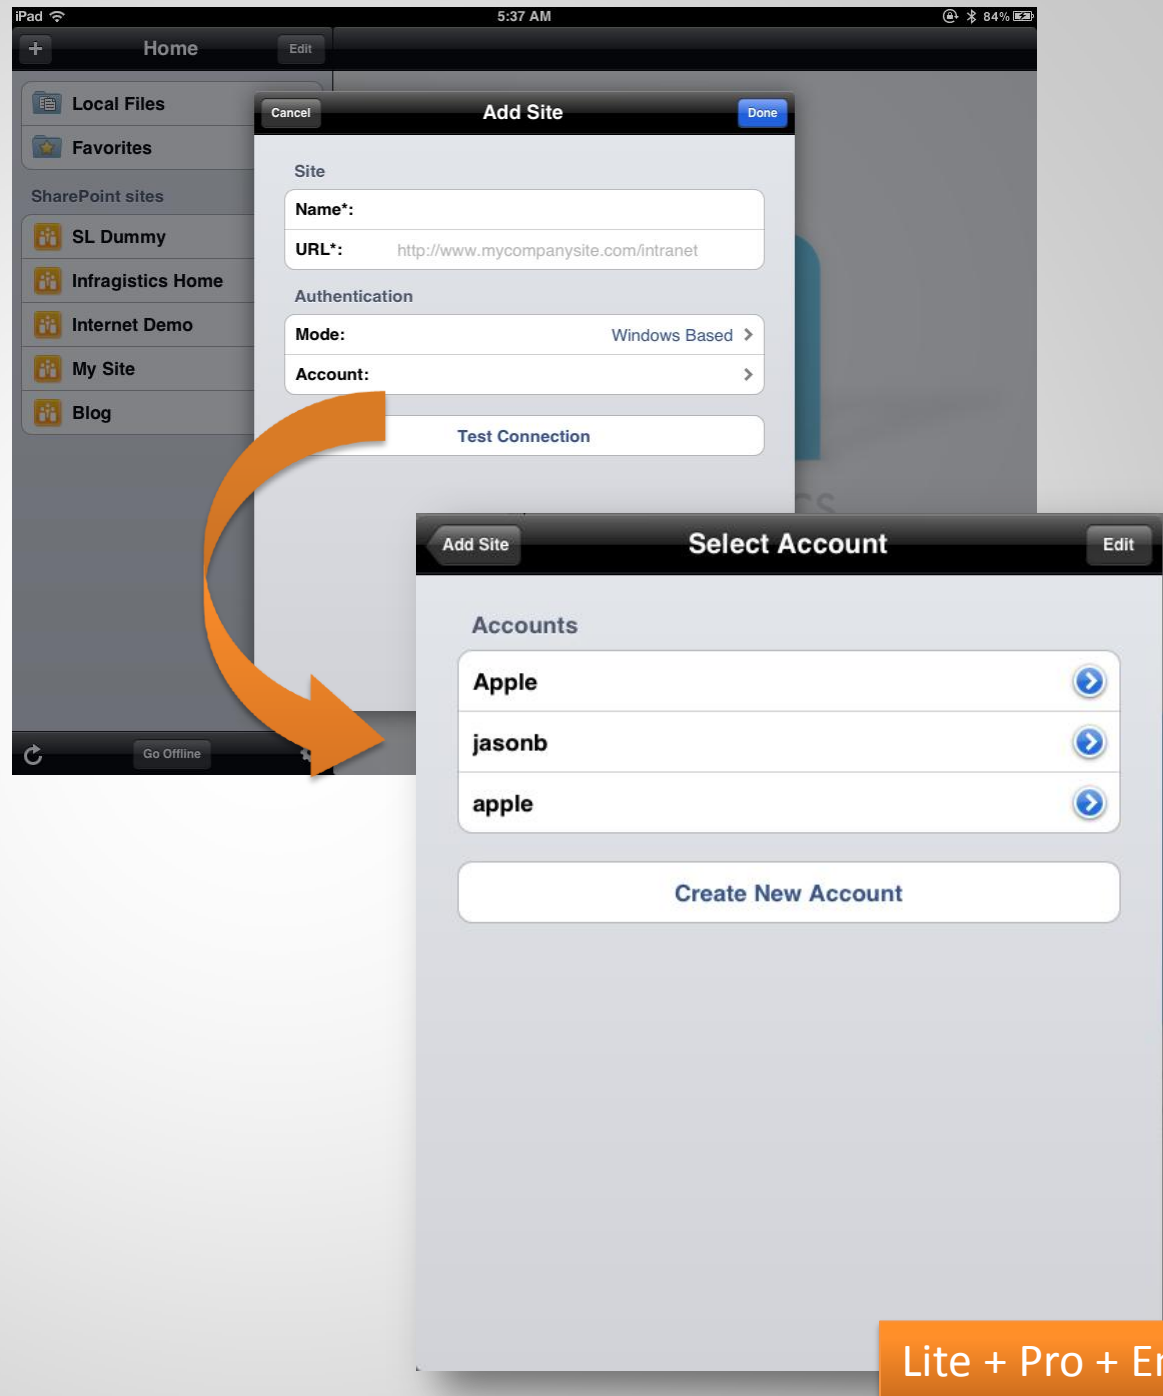

Preserve battery by enabling this feature when device is plugged in.

Account Management

Manage multiple servers with single account definitions.

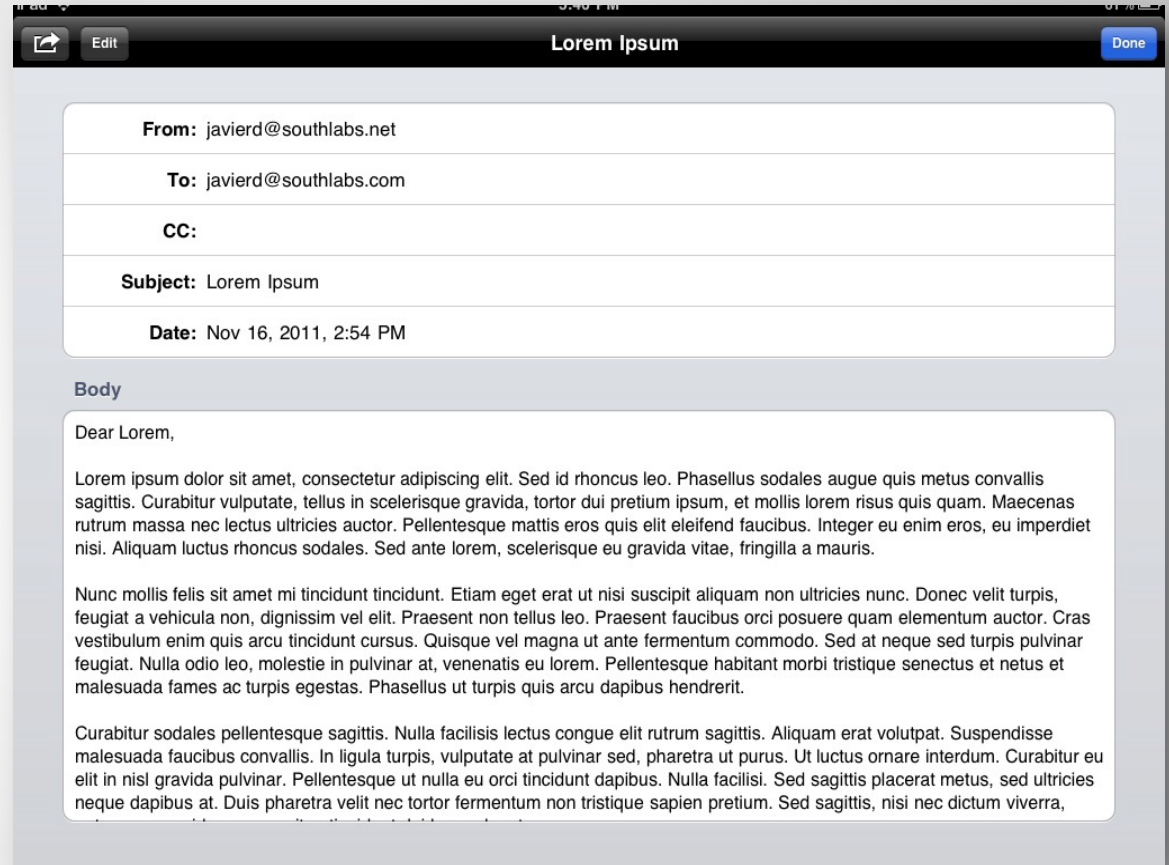

This avoids the re-signing in if credentials change across multiple sites / servers.

Email Viewer

SharePoint supports configuring incoming emails to SharePoint libraries.

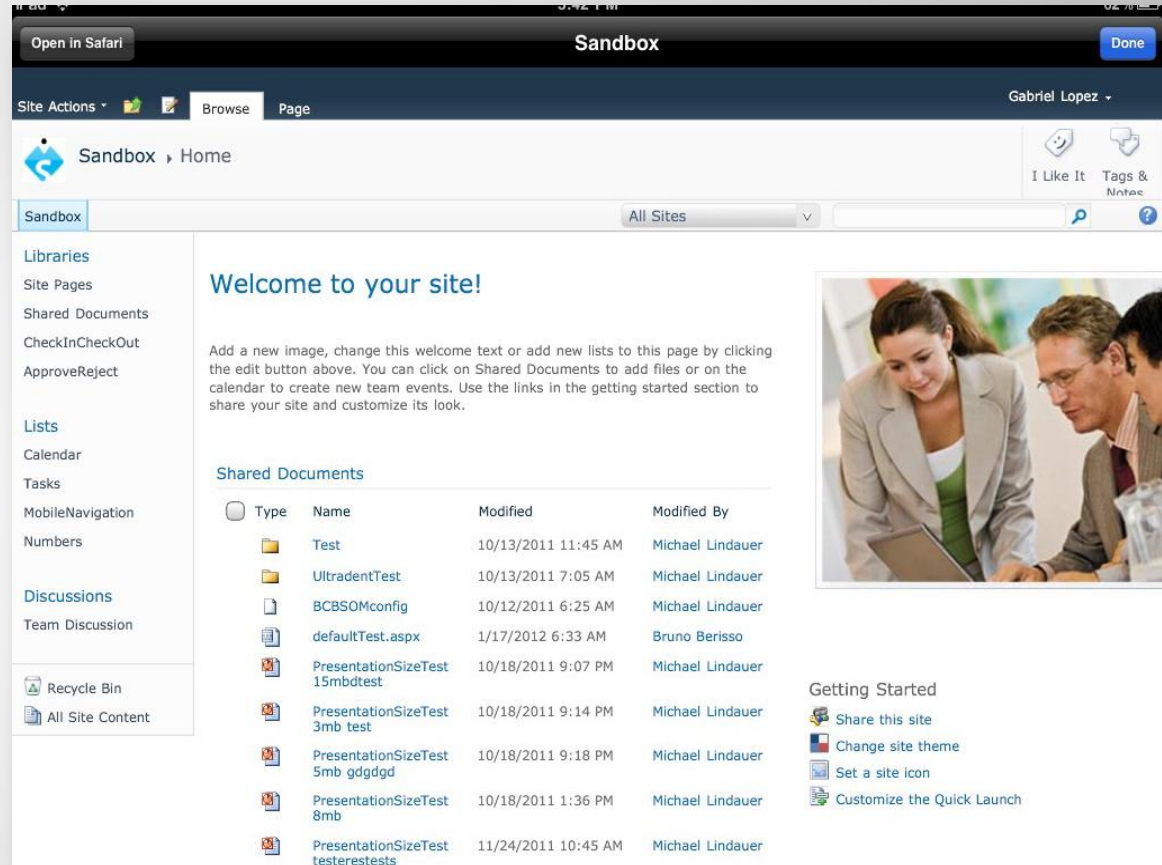

This features provides support to display the .eml and .msg attachments stored in the generated list items, to view emails within SharePlus.

Contextual WebView or Toggle WebView

Support to display
SharePoint's out of the
box web view, as
displayed from the
Safari browser, for a
selected site or library.

This allows the user to
leverage the best of
both worlds, view html
web parts, dashboards,
and menus

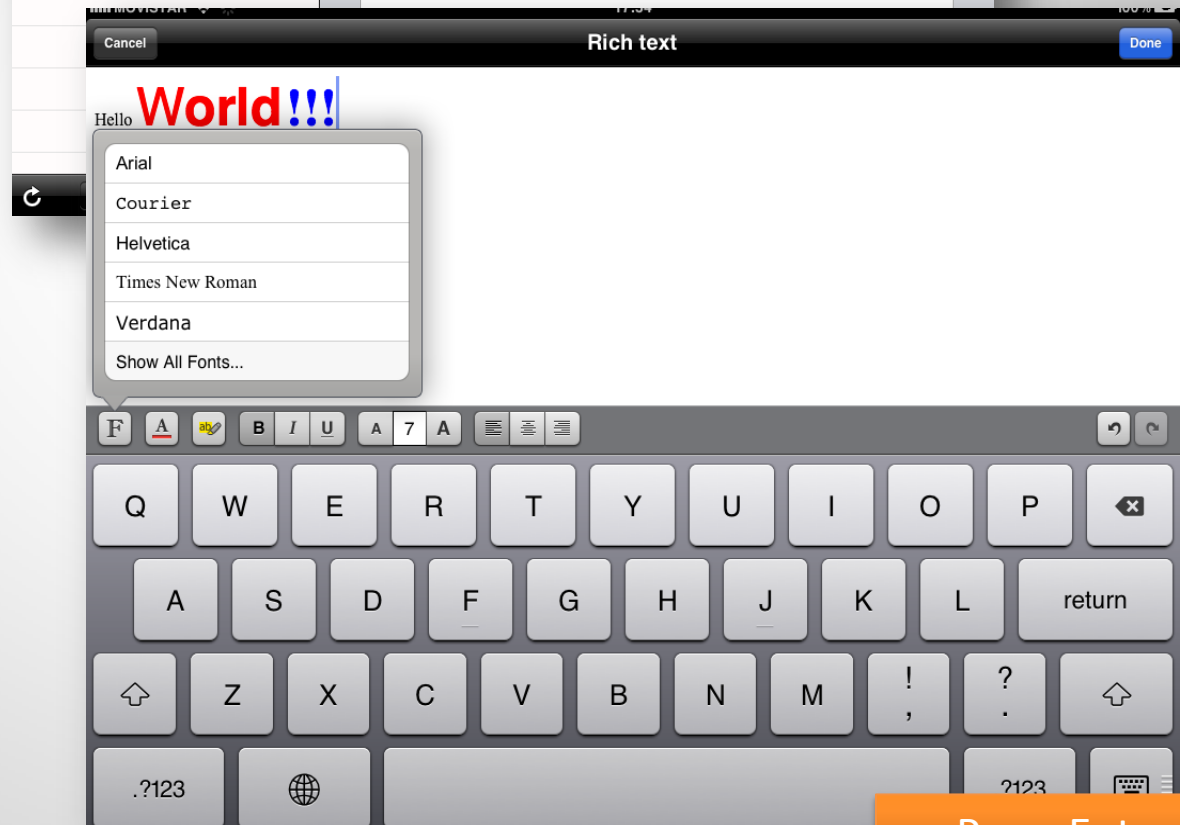

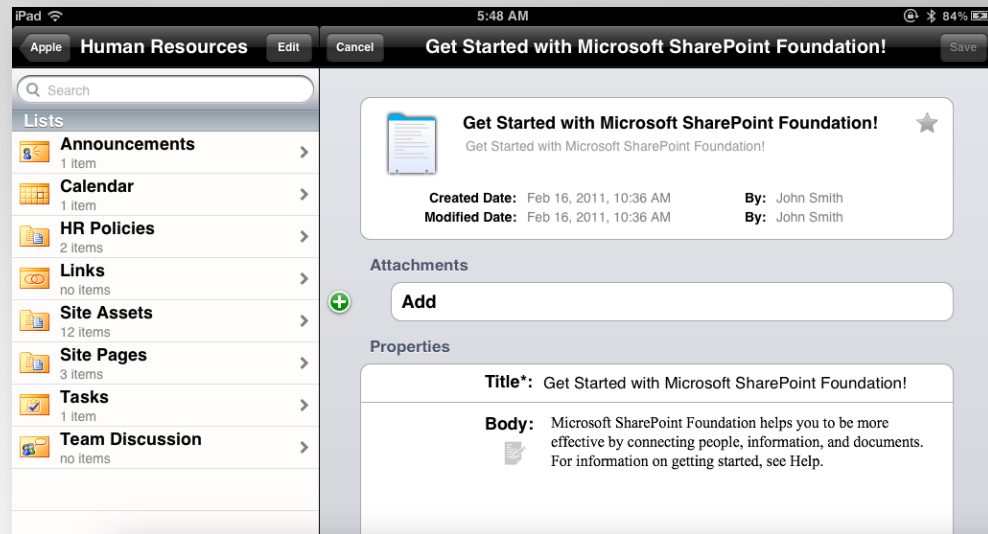

Rich Text Editor

For iOS5, the rich text editor is a control that provides a “what you see is what you get” editing interface, for decorating the text with visualization attributes such as bold, italics, font color, font size.

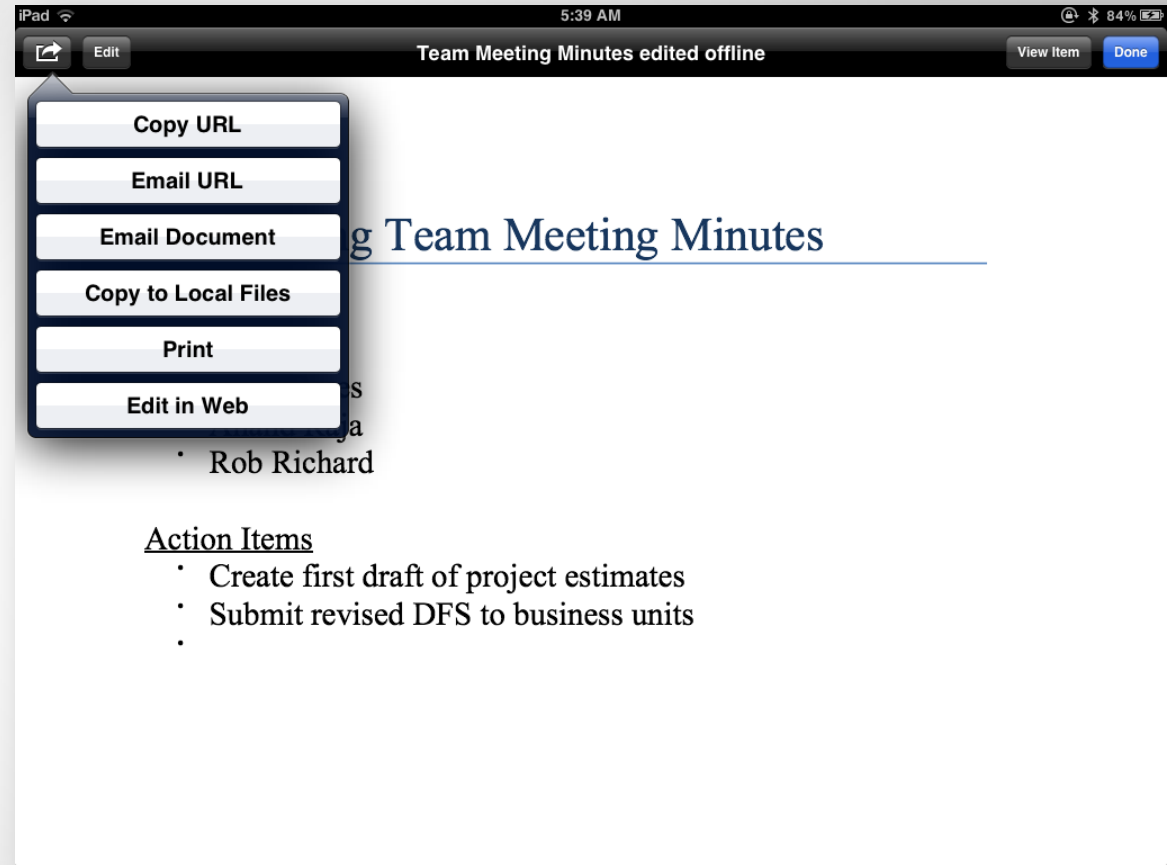

This applies to columns typically used for description fields, blog body entries, team discussions, comments, etc.

The supported attributes are: bold, italic, underline, text font, text color, highlight color, text size, text alignment.

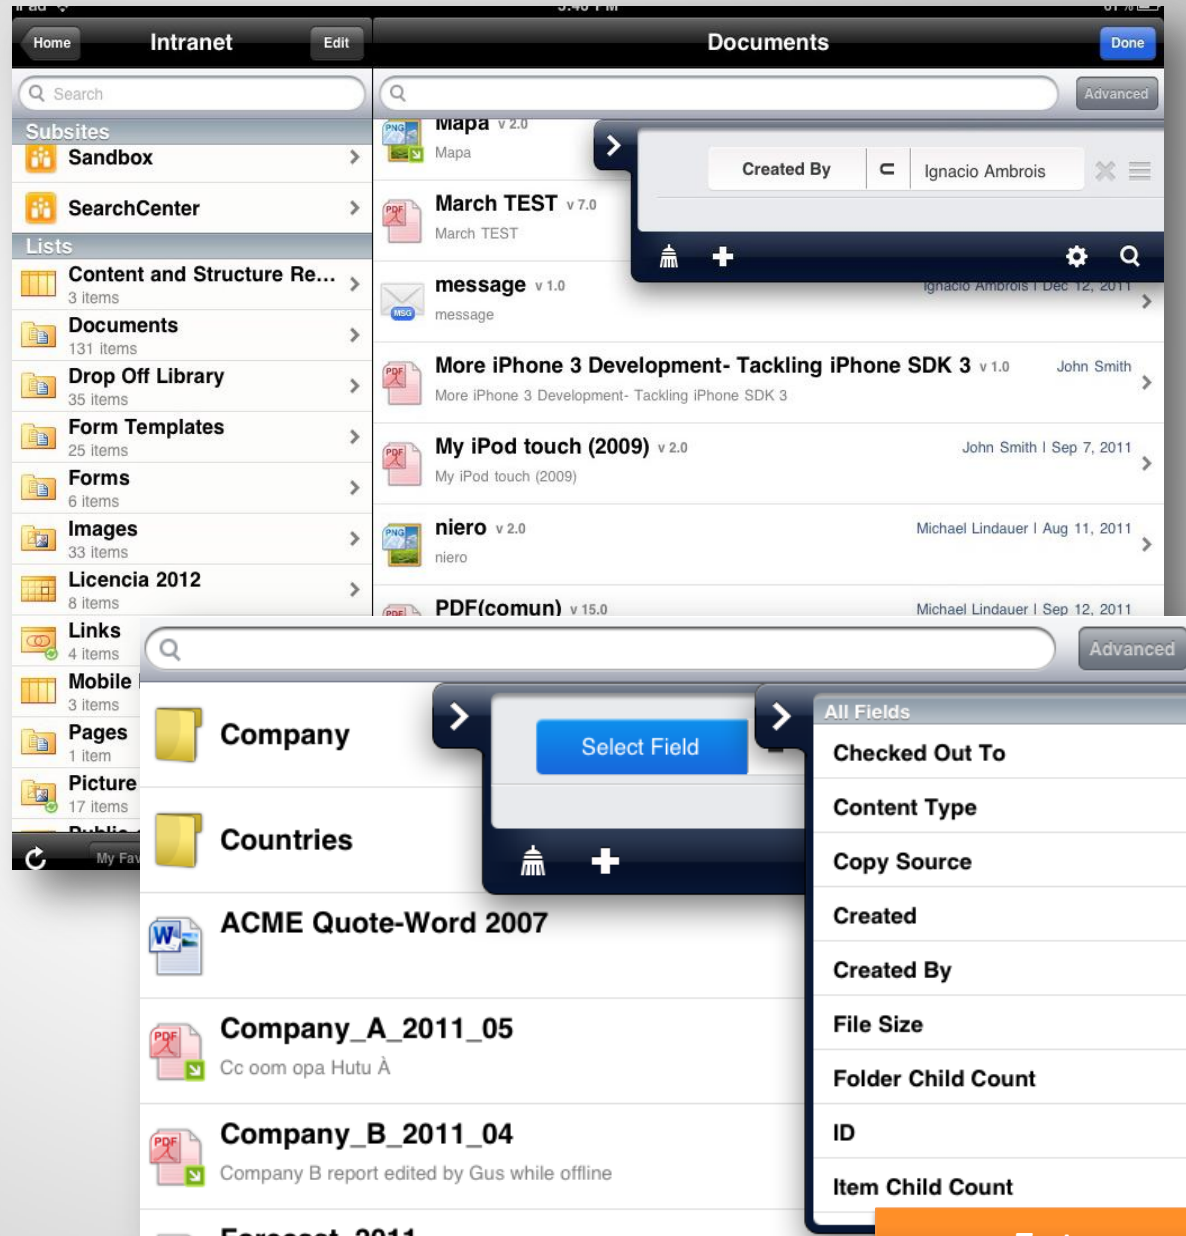

Edit in Web

If Office Web Apps are installed on your servers, you can edit documents in Word, Excel, PowerPoint online

Advanced List Search

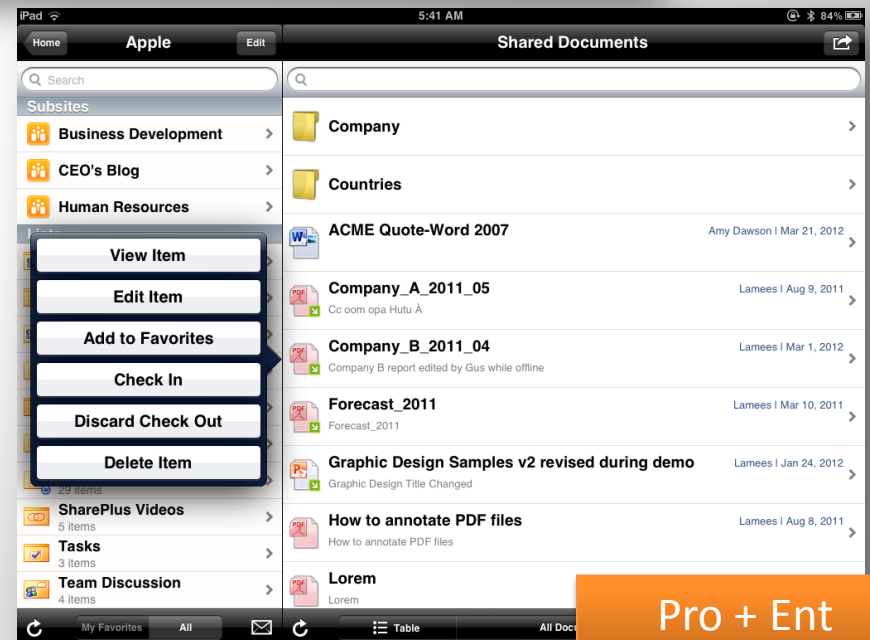

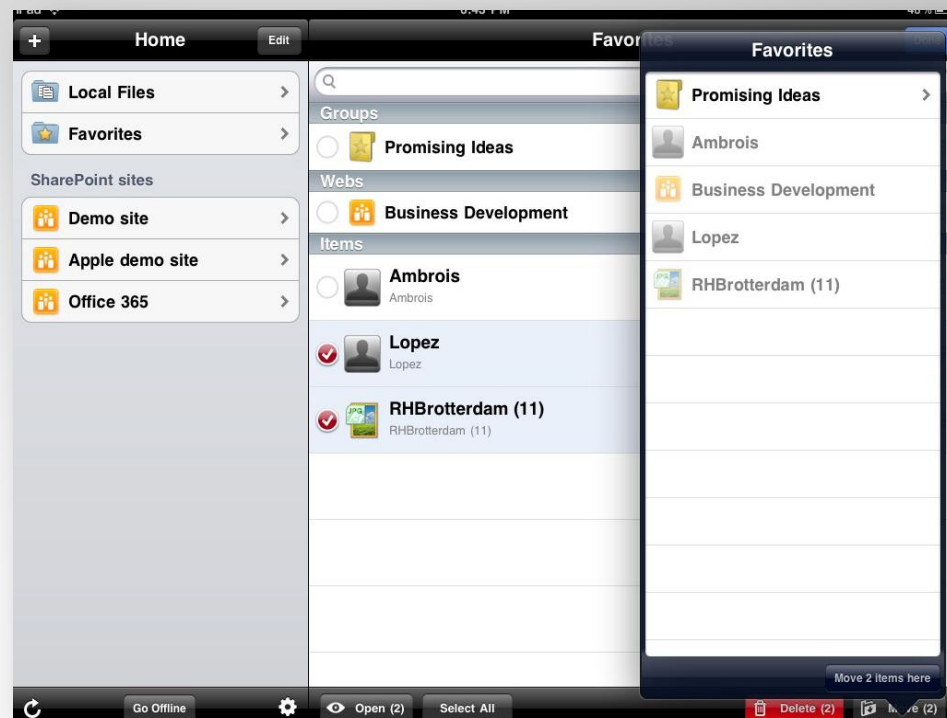

Support to define search criteria's in the list search level, allowing the user to declare search terms for specific columns, and concatenate multiple search terms, for multiple columns.

Power Favorites

Mark documents, lists, and sites, as favorites, to allow a shortcut access directly from the initial view of the application, optimizing the access to critical information for the user.

Includes support to manage links in folders, and rearrange them in personalized hierarchical structures that maybe different from those of the SharePoint farm

Pro + Ent

Picture Swipe

Navigate a set of pictures in a Picture Library by viewing one picture at a time, maximized, and go over the whole collection with the swipe gesture.

Great for scenarios such as sales forces displaying catalog / product like information.

Mobile Navigation

Set properties on behavior of lists in the SharePlus navigation

The screenshot shows an iPad interface for a mobile navigation application. The top status bar indicates 'iPad', signal strength, and time '5:41 AM' with 84% battery. The app has a dark header with 'Home', 'Apple', 'Edit', and 'MobileNavigation' buttons. A search bar is at the top of the content area.

Subsites:

- Business Development
- CEO's Blog
- Human Resources

Lists:

- Announcements (2 items)
- Calendar (26 items)
- Contacts (5 items)
- Expense Forms (no items)
- MobileNavigation (12 items)
- Pictures (48 items)
- Shared Document (29 items)
- SharePlus Videos (5 items)
- Tasks (3 items)
- Team Discussion (4 items)

Main Content Area (List of Items):

Item	Attachments	List Title	Hidden	Default Mobile View
Site Assets	Site Assets	Site Assets	Yes	Default Mobile Vi...
Site Pages	Site Pages	Site Pages	Yes	Default Mobile Vi...
MobileNavigation	MobileNavigation	MobileNavigation	No	Default Mobile Vi...
Team Discussion	Team Discussion	Team Discussion	No	Default Mobile Vi...
Shared Documents	Shared Documents	Shared Documents	No	Default Mobile Vi... All Documents
Pictures	Pictures	Pictures	No	Default Mobile Vi...

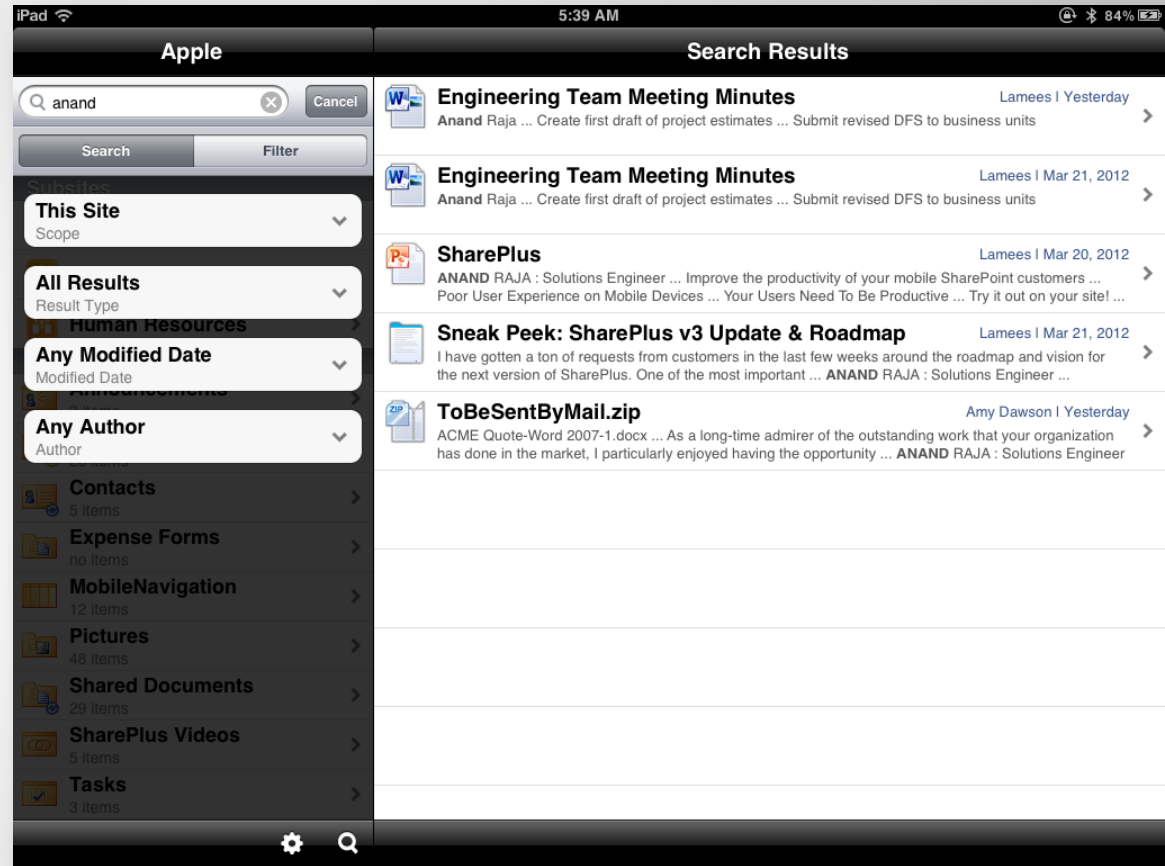

Properties Dialog (for 'Site Assets'):
